Professional Summary

Mid-Level Full-Stack Software Developer with strong hands-on experience in TypeScript (NestJS, Vue.js) and Python (FastMCP). Specialized in developing complex integrations, event-driven architectures, and AI-driven automation using the Model Context Protocol (MCP). Proactive, focus-driven on delivering high-impact scalable solutions, backed by a solid theoretical foundation in Software Engineering.

Professional Experience

liveSEO Agency — *Mid-Level Full-Stack Web Developer*

October 2024 – Present

- Responsible for designing, maintaining, and scaling critical internal systems for project management, e-commerce integrations, and AI initiatives using TypeScript and Python.
- Actively manage, maintain, and troubleshoot staging and production server environments; performing SSH-based remote debugging, examining Docker container runtimes, monitoring application logs, and managing manual or pipeline-triggered application rebuilds and redeployments to guarantee high system availability.
- Designed and built from scratch a microservice managing WhatsApp communications integrated with the Evolution API, featuring an administrative dashboard with AI-driven response recommendations and automated message routing from group chats directly to specific teams' Google Chat channels.
- Designed and configured custom CI/CD pipelines to automate unit testing, formatting, and linting checks (ESLint), preventing deployment issues and securing code quality before staging environments.
- Led the design and development of a custom MCP (Model Context Protocol) server integrated with internal systems, enabling an ecosystem of autonomous AI agents to automate complex business workflows.
- Developed an end-to-end integration between the internal project management tool and the Shopify e-commerce API, optimizing business operations and saving approximately 50 work hours per week.
- Actively focused on implementing robust authentication mechanisms and secure, high-performance integration and communication between distinct microservices within the corporate ecosystem.
- Spearheaded the complete refactoring of legacy applications and high-complexity

modules in the internal management systems, applying Clean Code and Design Patterns to reduce customer-reported bugs and support tickets by over 90%.

- Worked closely with event-driven message brokers (NATS), relational databases (PostgreSQL, MySQL), and participated in active team Peer Code Reviews to ensure alignment with complex business logic and keep codebase standards high.

Education

State University of Maringá (UEM) — *B.S. in Software Engineering*

May 2024 – Expected 2029 (In progress)

Comprehensive engineering program with a strong emphasis on core computer science and systems architecture, covering Algorithms, Functional Programming, Database Systems, Requirements Engineering, Software Architecture, Compilers, Formal Languages, and Automata.

Projects & Community Involvement

- **MCP & AI Automation Workshop:** Invited speaker at SECOMP (UEM's Computer Science & Engineering Week) on behalf of liveSEO, delivering a hands-on workshop about Model Context Protocol and autonomous agent architectures for enterprise automation.
- **Community Outreach Project — UEM:** Co-instructed a practical digital literacy course designed for adults and the elderly in the local community, teaching essential computing skills to promote digital inclusion.

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL

Frameworks, Libraries & APIs: NestJS, Vue.js, FastMCP, Node.js, Evolution API

Messaging, Databases & Infrastructure: NATS, PostgreSQL, MySQL, Docker, SSH, Troubleshooting, CI/CD (GitHub Actions)

Concepts & Architecture: Model Context Protocol (MCP), Microservices Architecture, Authentication Systems, Design Patterns, Functional Programming, RESTful APIs, Git/GitHub, Linux

Languages Spoken: Portuguese (Native), English (Intermediate to Advanced)

Soft Skills

Complex problem-solving, proactivity, team collaboration, technical adaptability, clean code practices (Clean Code), and continuous learning.

Certifications & Courses

- **Advanced AI-Assisted Development** — Tech Leads Club
- **Design Patterns in TypeScript - Understanding Design Patterns** — Udemy
